

THE PROMISE OF
DIGITAL LEARNING
DELIVERED DAILY

Junyo Streams™

Simple. Secure. Personal.

Junyo Streams

Powerful Features that Lead to Enhanced Learning:

- Fast, fluid search, organization, and delivery of Junyo Streams made of open and licensed content to personalize learning.
- Teacher, school and district selection of content matches the learning context so open and licensed content's easy to access.
- Precision tools to match content to teachers' requirements and students' learning needs.
- Educator-driven, crowd-sourced learning Streams curation, so learning resources are educator-vetted and recommended.
- Content rankings for individual teacher and student use, so the library of resources grows in depth, breadth and quality.
- Integrated formative assessment links to focused, targeted instruction so students "own" their learning.
- Embedded accountability integrates teacher, student and content usage with student performance data; so that teachers can see what works.
- State-of-the-art data security and no-fail privacy for all users.

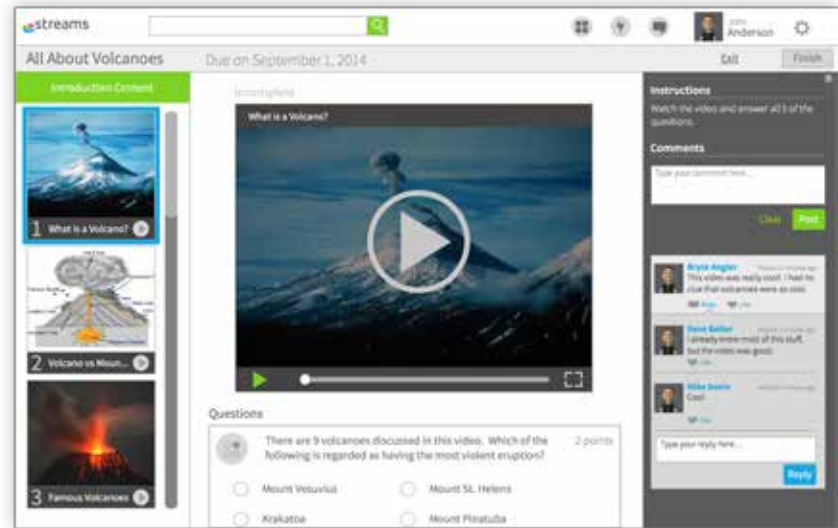

**JUNYO

DIGITAL
LEARNING
THE WAY
EDUCATORS
AND
STUDENTS
ALWAYS
IMAGINED
IT COULD BE...
FLUID,
POWERFUL,
ACCESSIBLE,
INSPIRING.**

Junyo Streams is All Kinds of Digital Learning in One Powerful Toolbox

Streams provides teachers:

- **Organized access** to open and licensed content so it's **simple** to find the right resources at the right time.
- **Individualized learning** managed by teachers and informed by each student's learning needs.
- **Secure, cloud-based file storage** and retrieval for safe, convenient, reliable access.
- **Embedded analytics** about the **effectiveness** of students' interaction with content and activities.
- **Community of educators that** supports every teacher, as teachers share lessons, activities, and assessments, and collaborate with other Streams users.

Create and track assessments using the learning streams you build.

Individualize instruction to close skill gaps and accelerate achievement for the whole class, small groups and individual students.

Junyo Streams launches in multiple districts and schools for the 2014-15 year in the U.S., Asia, and Canada.

Junyo Streams Addresses Your Priorities

STAKEHOLDERS spend smarter for instructional resources through access to open and licensed content and achieve continuous improvement based on data generated through Streams' formative assessment and data visualization dashboards.

TEACHERS fluidly create learning streams to address students' learning paths and receive real-time feedback about each learner's progress.

STUDENTS thrive with personalized Streams, using resources and content selected to address their individual needs.

PUBLISHERS participate in an iTunes-like marketplace generating earned income and satisfying customer needs/requirements.

The screenshot displays the Junyo Streams interface for a learning stream titled "All About Volcanoes". The stream is assigned for the period of August 14, 2014, to September 1, 2014. The interface is divided into several sections:

- Playlist Activities:** A vertical list of three activities: "1. What is a Volcano?", "2. Volcano vs Mount...", and "3. Famous Volcanoes".
- Progress Tracking:** A central area showing the progress of three students: James Glass, Bryan Anglin, and Lauren Grant. Each student has a progress bar and a status indicator (e.g., "In Progress", "Completed").
- Comments:** A section on the right side of the interface where students can leave comments. It includes a "Type your comment here..." text area, a "Clear" button, and a "Post" button. Below the text area, there are three comments from Bryan Anglin, Steve Butler, and Mike Smith.

No-Fail Data Security

Security is a core component for Streams. Our team of experts has built secure technology for companies such as MasterCard, IBM, Charles Schwab, AT&T, CNET and BBC. With Streams, security is built in right from the start—it's not bolted on at the end of the development process. Our internal and vendor policies strictly forbid any sale of student personal data. As a Streams user, you can be assured that Junyo and all third parties operate with the most stringent security requirements.

Compatible Learning Management and Resources Systems Include:

- Blackboard Learn
- Canvas
- Angel
- myBigCampus
- ePortfolio
- Engrade Pro
- Desire2Learn
- Moodle
- GlobalScholar Pinnacle
- Schoology and more...

LMS Integration

Junyo Streams integrates with most major Learning Management Systems (LMS) and is IMS Global LTI certified. Integration includes single sign-on for several LMS systems for barrier-free access to instructional content and tools.

Introducing Junyo Streams

STREAMS RESOURCE LIBRARY

Collect and access all of your open and licensed digital resources from one library. Search by curriculum, student need, use case, content efficacy, users' rankings, standards or other criteria to create custom learning streams. Accessible from any LMS or directly from Streams.

STREAMS ASSESSMENTS

Leverage formative assessments which deliver feedback to inform personalized learning pathways and link to specific learning streams for immediate intervention.

THE STREAMS COMMUNITY

Share learning strategies and content preferences and rankings with colleagues inside your school or district and other Streams users around the country and the world.

STREAMS CLOUD

Upload any files with iron-tight security and privacy, both from Streams and any other instructional content or data you choose. Streams Cloud is a responsible and secure alternative to commercial cloud storage such as Dropbox, Box.net and Google Drive.

STREAMS ANALYTICS

See resource usage, student performance and other benchmark data points in a ready-access data visualization dashboard so administrators, instructional leaders, teachers, families and students can make optimal instructional choices.
